

A dynamic splash of clear water against a white background, with droplets and ripples. The splash is centered and fills most of the upper half of the image.

BioSumeTM

Cleaning By **Consumption**

A green-tinted microscopic view of various biological organisms, including spherical bacteria with flagella and clusters of smaller spherical cells, set against a dark green background.

Bioremediation SOLUTION

FloorClean™

Bioremediation SOLUTION

Stronger and Lasts Longer Free of Harmful Chemicals

FloorClean outperforms traditional chemical cleaners by dissolving and consuming surface grease and grime. Cleaning continues at the molecular level long after the initial application, allowing floors to be kept cleaner for longer. Our product regularly controls the source of obnoxious odors and reduces workplace floor slippage by removing embedded soil from floor surface pores, grout, and cracks.

INTENDED FOR DAILY USE ON:

Ceramic, Vinyl, Hardwood, Concrete, and Other Water-Safe Surfaces.

1 gal.

5 gal.

55 gal.

KEY BENEFITS:

- Continuous cleaning action at work
- No residue for a high gloss finish
- Naturally eliminates odors
- Requires no special equipment
- Intended for daily use
- Safe for all water-safe surfaces

FOR BEST RESULTS:

When cleaning, combine with warm water. Increase product contact time to improve product performance. For old or heavy build-up, repeat application. To get a deeper clean, use a scrub brush. As needed, rinse with clean water.

DIRECTIONS:

Mix 2-3 ounces FloorClean with one gallon of water for a ready to use cleaner. Apply FloorClean during your nightly mopping of all tile surfaces, including bathrooms. This product is effective on all water-safe surfaces. Note that when using FloorClean, you can dramatically reduce the amount of water you use to clean your floors. Rather than apply large amounts and then mop away, you will apply a light coating of FloorClean to your surfaces and allow it to penetrate pores and micro-cracks in your tile and grout. Allow a minimum of 5 minute contact or let dry overnight. If you choose to rinse after 5 minutes you can distribute the leftover FloorClean solution amongst your floor and sink drains to clean them and keep them flowing freely. Occasionally, you can leave the solution in the bucket overnight and soak your mops and brooms to restore them. When you mop again during the day, use water only to re-awaken the FloorClean and continue its cleaning action

Additionally, you can fill your bar sink with warm water and add 1 ounce of FloorClean to soak you bar mats which also will leave your sinks sparkling clean..

STORAGE & HANDLING:

Store FloorClean in a cool, dry place away from direct sunlight. Use within 12-24 months for best results.

BoatClean™

Bioremediation SOLUTION

Our concentrated bioremediation solution is non-toxic and non-hazardous to waterways. The solution cleans by consuming waste, odor, grease, and other contaminants without the use of harmful chemicals. Our product complies with the modified Clean Water Act of 1987, formerly known as the Federal Water Pollution Control Act, as well as the US Environmental Protection Agency. As an example, to remove mold and mildew stains, mix two to four ounces of the solution per gallon of hot water.

CLEANS: Decks, Fish Cleaning Platforms, Fish Holds, Galleys, Heads, Bilges, Boat Exterior Surfaces, Lines and Sails.

GymClean[™]

Bioremediation SOLUTION

Powerful, Longer Lasting Clean with No Noxious Chemicals

GymClean is intended for usage in all areas of a gym on a daily basis. Showers, restrooms, dressing rooms, gym equipment, ceramic, vinyl, hardwood, concrete flooring, or any other water-safe surface are all examples. By breaking down and eating surface grease and filth, it surpasses ordinary chemical cleansers. Cleaning continues at the molecular level long after the initial application, allowing floors and equipment to be kept cleaner for longer.

GymClean periodically reduces the cause of annoying aromas such as urine, sweat, and other odors associated with a gym by eliminating embedded soil from the gym surface.

CLEANS: Gym Equipment

KEY BENEFITS:

- Continuous cleaning action at the gym
- Leaves no residue for high gloss
- Naturally eliminates odors
- No special equipment required
- No special equipment required
- Safe for all water-safe surfaces

FOR BEST RESULTS:

Mix with warm water when cleaning. Increase contact time to enhance product performance. Apply multiple times for old or heavy build-up. Use a scrub brush to achieve a deeper clean. Rinse with clean water as needed

STORAGE & HANDLING:

Store GymClean out of direct sunlight in a cool dry area. For best results, use within 12-24 months.

CarpetClean[™]

Automotive CARPET & UPHOLSTERY CLEANER

Powerful, Longer Lasting Clean with No Noxious Chemicals CarpetClean is designed for everyday use on automotive carpet, upholstery or any water-safe surface. It outperforms standard chemical cleaners by breaking down and consuming grease and grime. Long after the initial application, cleaning continues at the molecular level enabling floors to be kept cleaner longer. By removing embedded soil from carpet and upholstery, CarpetClean regularly controls the source of obnoxious odors.

CLEANS: Automotive Carpet, Upholstery or any Water-Safe Surface.

KEY BENEFITS:

- Continuous cleaning action at work
- No residue for a high gloss finish
- Naturally eliminates odors
- Requires no special equipment
- Intended for daily use
- Safe for all water-safe surfaces

FOR BEST RESULTS:

Mix with warm water when cleaning. Increase contact time to enhance product performance. Apply multiple times for old or heavy build-up. Use a scrub brush to achieve a deeper clean and rinse with clean water as needed

STORAGE & HANDLING:

Store CarpetClean in a cool, dry place away from direct sunlight. Use within 12 months for best results.

GreaseTrap+[™]

Bioremediation SOLUTION

A green solution to your persistent grease trap problem, GreaseTrap+ actually eats grease to maximize trap capacity! GreaseTrap+ is an all-in-one cleaner, deodorizer, and grease trap maintenance product. GreaseTrap+ works by using a proprietary blend of microorganisms that digest food waste. These micro-machines break down fats, oils, greases, complex sugars, fatty acids, and proteins naturally. Because it is so effective, any organic contaminate that is removed will not reform. This procedure keeps grease traps flowing freely, neutralizes odors, and maximizes capacity.

1 gal.

5 gal.

55 gal.

275 gal.

DIRECTIONS:

The grease trap unit must be cleaned first. Add 4 ounces of GreaseTrap+ (GT+) directly to the line that connects to your grease trap, if you have more than one line add another 2 ounces of GT+ to the secondary line to your grease trap. One pump equals one ounce of concentrated product. It is important to add GT+ to drains as your last step of the night to avoid contaminating GT+ with soap from your dishwashing.

Depending on the size of the grease trap, you will apply GT+ manually for small grease traps. For large grease traps we suggest using a peristaltic pump that will deliver the GT+ solution at a specific time nightly.

EASY TO USE - FOR BEST RESULTS:

When cleaning, combine with warm water. Increase product contact time to improve product performance. For old or heavy build-up, repeat application. To get a deeper clean, use a scrub brush. As needed, rinse with clean water.

STORAGE & HANDLING:

Store FloorClean in a cool, dry place away from direct sunlight. Use within 12-24 months for best results.

BioSume™

Cleaning By *Consumption*

Bioremediation SOLUTION

Cleaning by Consumption . . . No Harsh Dangerous Chemicals, or Compounds. Safe for you and the Planet.

bi·o·re·me·di·a·tion
/,bīōri,mēdē'aSHən/

NOUN 1. The use of either naturally occurring or deliberately introduced microorganisms or other forms of life to consume and break down environmental pollutants, in order to clean up a polluted site.

**When it's time to clean up,
it's time to let BioSume products
go to work for you.**

BioSume is a unique product line that offers the most effective, low-impact solution to the difficult task of combating urban stench in office buildings, government properties, marinas, and various transportation applications. There is also a line of BioSume products for home use. It's the pinnacle of Living Green Technology: a living solution containing non-pathogenic microorganisms rather than the traditional Dead Technology of harsh and toxic chemicals. BioSume Products are made of natural chemistry found in the environment and truly live to clean. The beauty of BioSume is that it simply accelerates the natural processes that occur during organic material breakdown.

HOW IT WORKS: The soluble organic matter is consumed by our naturally selected and adapted bacteria, which converts it into carbon dioxide, water, and energy to produce new cells. This process occurs naturally in nature, but at an extremely slower rate.

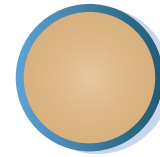

STORAGE & HANDLING: Keep BioSume Products away from direct sunlight and in a cool, dry place. Use within 12-24 months for best results. For more specific information, obtain a BioSume Product MSDS.
